EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. In order to avoid the form and legal phraseology often used in patent claims, such as "means", the abstract has been amended as follows: "Means" on p. 10, line 11 has been replaced with – Elements --, and "means for" on p. 10, line 13 has been replaced with – a mechanism for --.

3. The following is an examiner's statement of reasons for allowance: the primary reason for allowance of the claims is the inclusion of the means for displacing the massage body relative to the frame, which are formed by means for changing the distance between the two shafts. The closest prior art is Nonoue et al. (6,224,563), which discloses in fig. 4: a first shaft (51) and a second shaft (52) which are supported parallel with one another in a frame (50), one arm (73) which carries at least one massage body (72), the arm being coupled to the two shafts in such a manner that a rotation of the shafts brings about a massage movement of the massage body in a first and/or second direction, and means (spring 79) for displacing the massage body relative to the frame, except that it does not reveal that the means for displacing the massage body relative to the frame comprising means for changing the distance

between the two shafts. None of the prior art reveals the means for changing the distance between the two shaft in order to displace the massage body from the frame as claimed by the present invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
